Pearsons, George
God is My Source

2. God Is My Source

The opening chapter of a devotional workbook on financial provision. It diagnoses the trap of measuring needs against a paycheck and reframes God—not jobs, people, or credit—as the true source of supply. It then explains how to use the book: read 70 scriptures daily, say them, write them, and record what God does.

Key takeaways

- Stop comparing your paycheck to your need; that cycle only breeds discouragement.
- God, not government, people, or credit cards, is your source; His Word is your supply.
- You are not required to meet your own needs—God wants to do that for you.
- Renewing your mind takes daily repetition: read the scriptures aloud, write them, and keep a record of answered prayer to build faith.

Passages worth keeping

> *"Jesus is our Source and The WORD is our supply."*

The book's central thesis in one line.
